

Project Milestones and Accomplishments

Farm2Market Platform Progress

Project Overview

- Farm2Market is a digital marketplace connecting farmers directly to consumers.
 - - Role-based registration (Farmer, Consumer, Admin)
 - - Dynamic prototype with HTML, CSS, JS, localStorage
- 

Key Features Implemented

- Multi-step registration with admin approval
 - Role-based dashboards & sidebars
 - Public pages (Home, About, Contact, Browse)
 - Shopping cart with simulated checkout
 - Order history and wishlist functionality

UI/UX Highlights

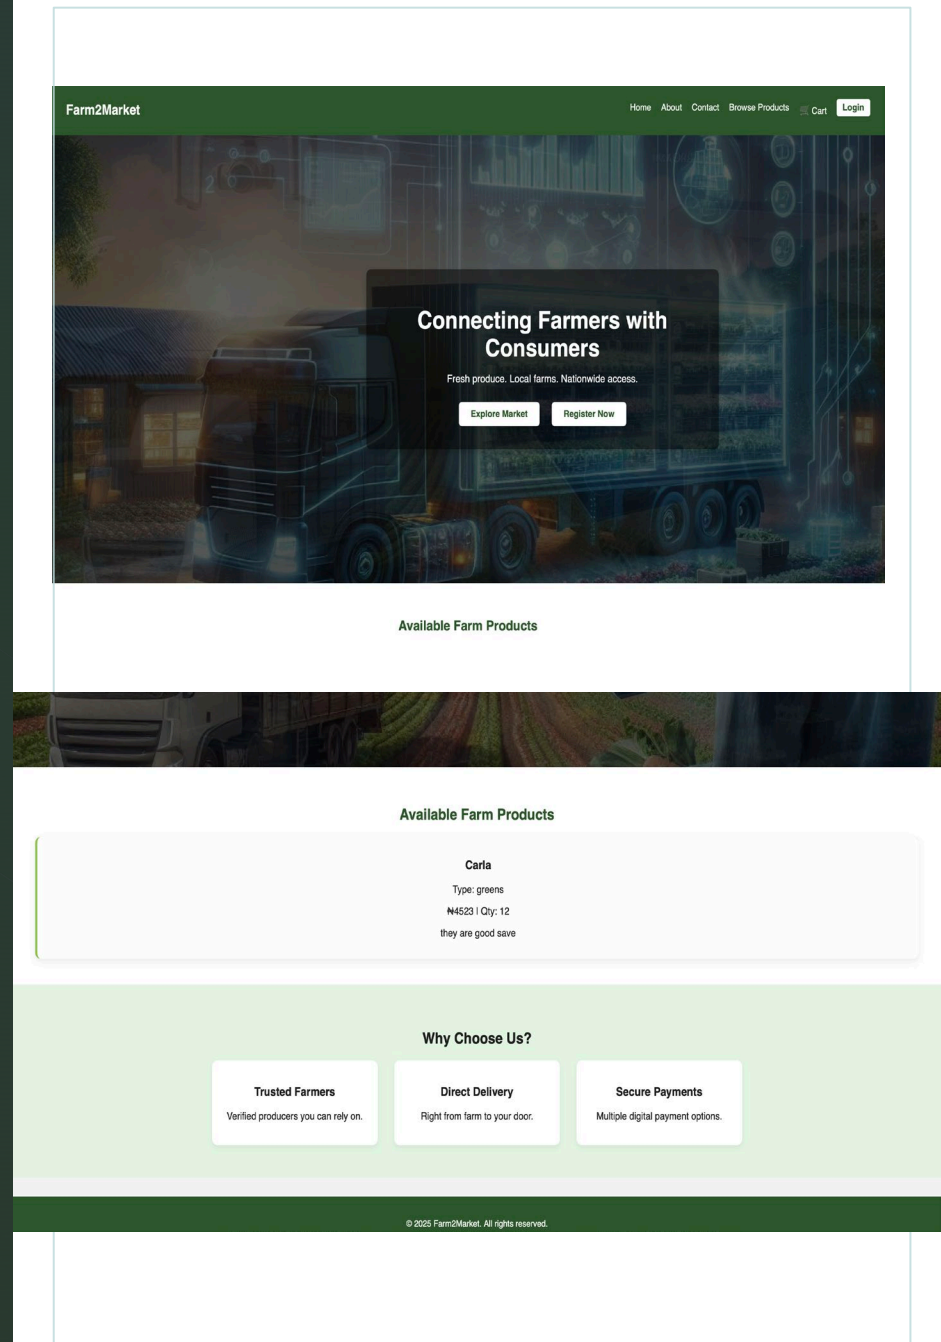

- Animated backgrounds and transitions
 - Responsive, mobile-friendly design
 - Professional color schemes and branding
 - Interactive modals and alerts
- 

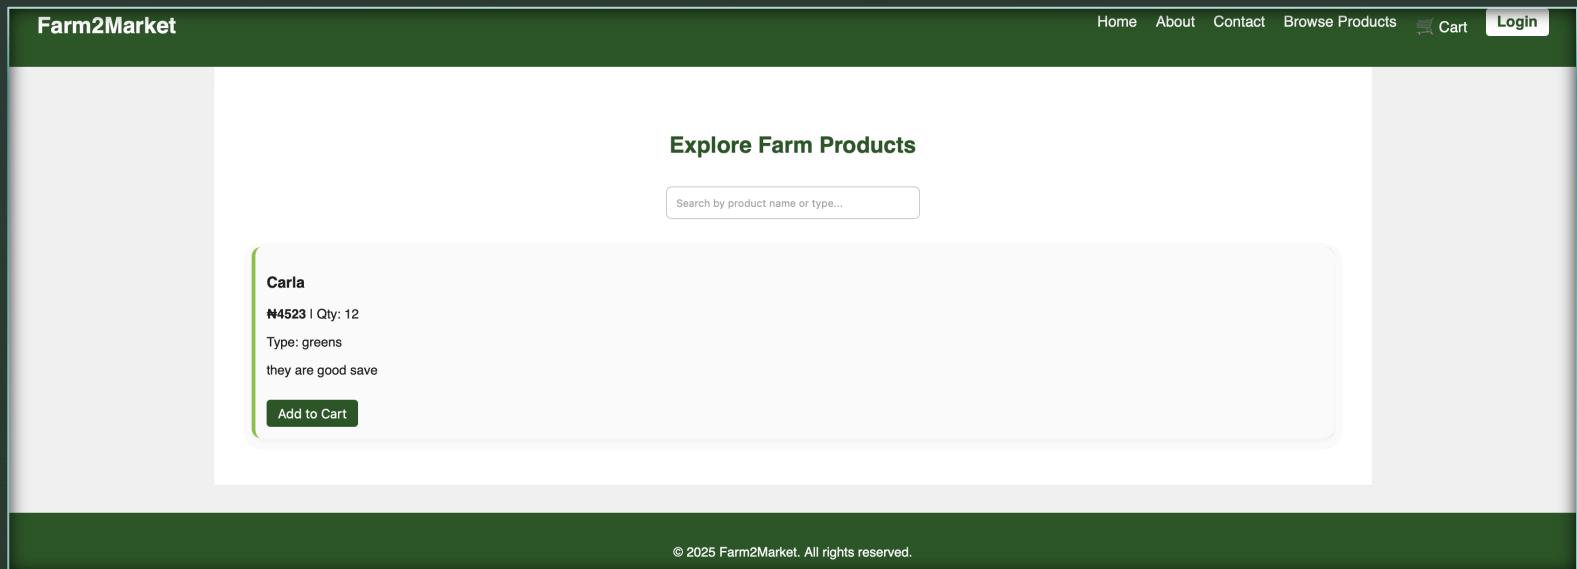

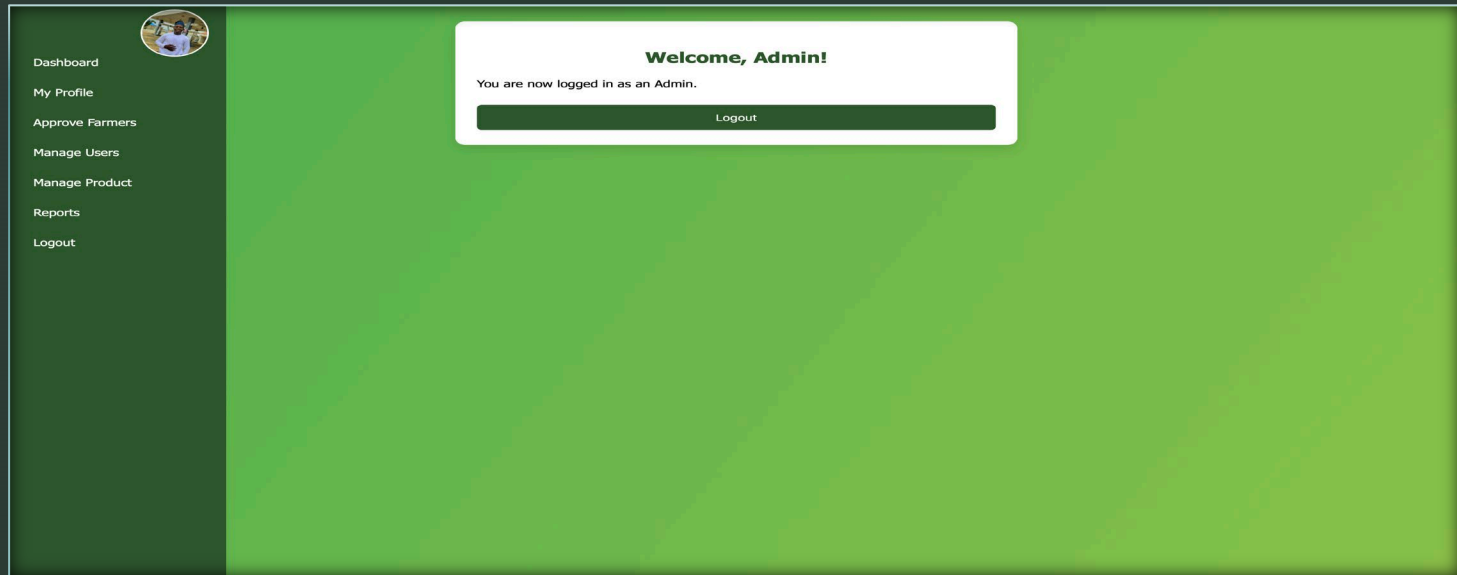

Next Steps

- Integrate backend (PHP & MySQL)
 - Implement Paystack for real payments
 - Enhance search & filtering
 - Deploy to production
 - Collect user feedback
